

Lifetherm

Warming beds for premature infants,
neonates and babies

Lifetherm

Practical orientated and flexible

A main priority of gentle care is to reduce the level of stress for the small patient, its relatives, and of course nursing staff. In conjunction with the experience of Heinen + Löwenstein in the field of warming therapy this realization has led to a user-friendly, development-oriented family of equipment. An extensive range of accessories allows it to adapt to particular specific requirements.

Lifetherm

WARMING BED

The warming bed is available without cover, with a closed cover or with a fold up cover that can be opened on both sides, and can be upgraded with extensive accessories.

- Effective heat transfer due to panel heater
